Letter From Our Principal Founder & CEO

In 2022, the world began to heal. Slowly, the wounds and scars left by COVID began to repair and fade. Gradually, the world emerged from the pain and suffering inflicted by this cruel virus, and life began again. For the most vulnerable among the world's populations, however, the ravages of the pandemic were more serious, the wounds and scars were deeper, and the healing process took longer. Add to this the devastating effects of global warming and natural disasters such as drought, flooding, and earthquakes. Already stretched economies and resources struggled and failed. Hunger and food insecurity remained, and poverty and lack of access to education and health care continued to threaten the safety, well-being, and happiness of families and children across the world.

For Moms Against Poverty, this represented an increased challenge. I'm proud (but not surprised) to say that we were more than up for the challenge! Thanks to the efforts of our amazing teams and partners on the ground in the regions we serve around the world - and an incredible response from sponsors and donors like you - **2.6 million people were helped in Iran, the US, Senegal, Cambodia, and across the globe.** As you read some of their stories in the following pages, I hope you will understand and share in my pride!

Construction continued at schools and orphanages, bringing education and hope for a brighter, more promising future. Children were fed a nourishing breakfast for the first time in their lives, graduates from our schools enrolled in university, struggling rural communities were lifted, girls and young women were encouraged and empowered at vocational schools and workshops, hospitals received life-saving equipment, and refugees were extended a vital lifeline and realized that they were not, after all, alone and forgotten by the rest of the world.

At the beginning of 2022, I was humbled and honored to receive the Jefferson Gold Award for Public Service. What a wonderful tribute! This prestigious award brought invaluable exposure to Moms Against Poverty by shining a welcome spotlight on our organization. This recognition will mean so much for us in the future and is a testament to how much Moms Against Poverty has grown and all that has been accomplished. Without the dedicated work of our volunteers, our amazing sponsors, donors, and the Moms Against Poverty family, however, this simply couldn't have happened - so I share it with you all with my heartfelt thanks!

Our work continues...

Delfarib Fanaie

Our Mission and Work

Moms Against Poverty (MAP) is a global 501(c)(3) non-profit organization with a mission to lessen the incidence and effects of poverty for impoverished children around the world, through Education, Health Care & Wellness, Hunger Relief & Basic Provisions, and Orphan Care programs so they can reach their fullest potential.

First, we address children's basic needs, such as food, shelter, and health care. Then, using education and vocational programs, we provide them with the tools and environment they need to thrive and become successful members of their community and the world at large.

We believe in empowering impoverished children while respecting their individuality and maintaining their dignity and self-esteem. Positive change and healing are not only possible but probable, when these children are treated with compassion and provided guidance and support.

By empowering individuals and communities, we create a lasting impact and forge a path toward ending the cycle of generational poverty.

Since 2008

We have impacted over
2,600,000 lives
in 17 countries

United States

Including:

California, Hawaii, New Jersey,
New Mexico, Pennsylvania,
Virginia, Washington DC

Mexico

Guatemala

Senegal

Sierra Leone

Ghana

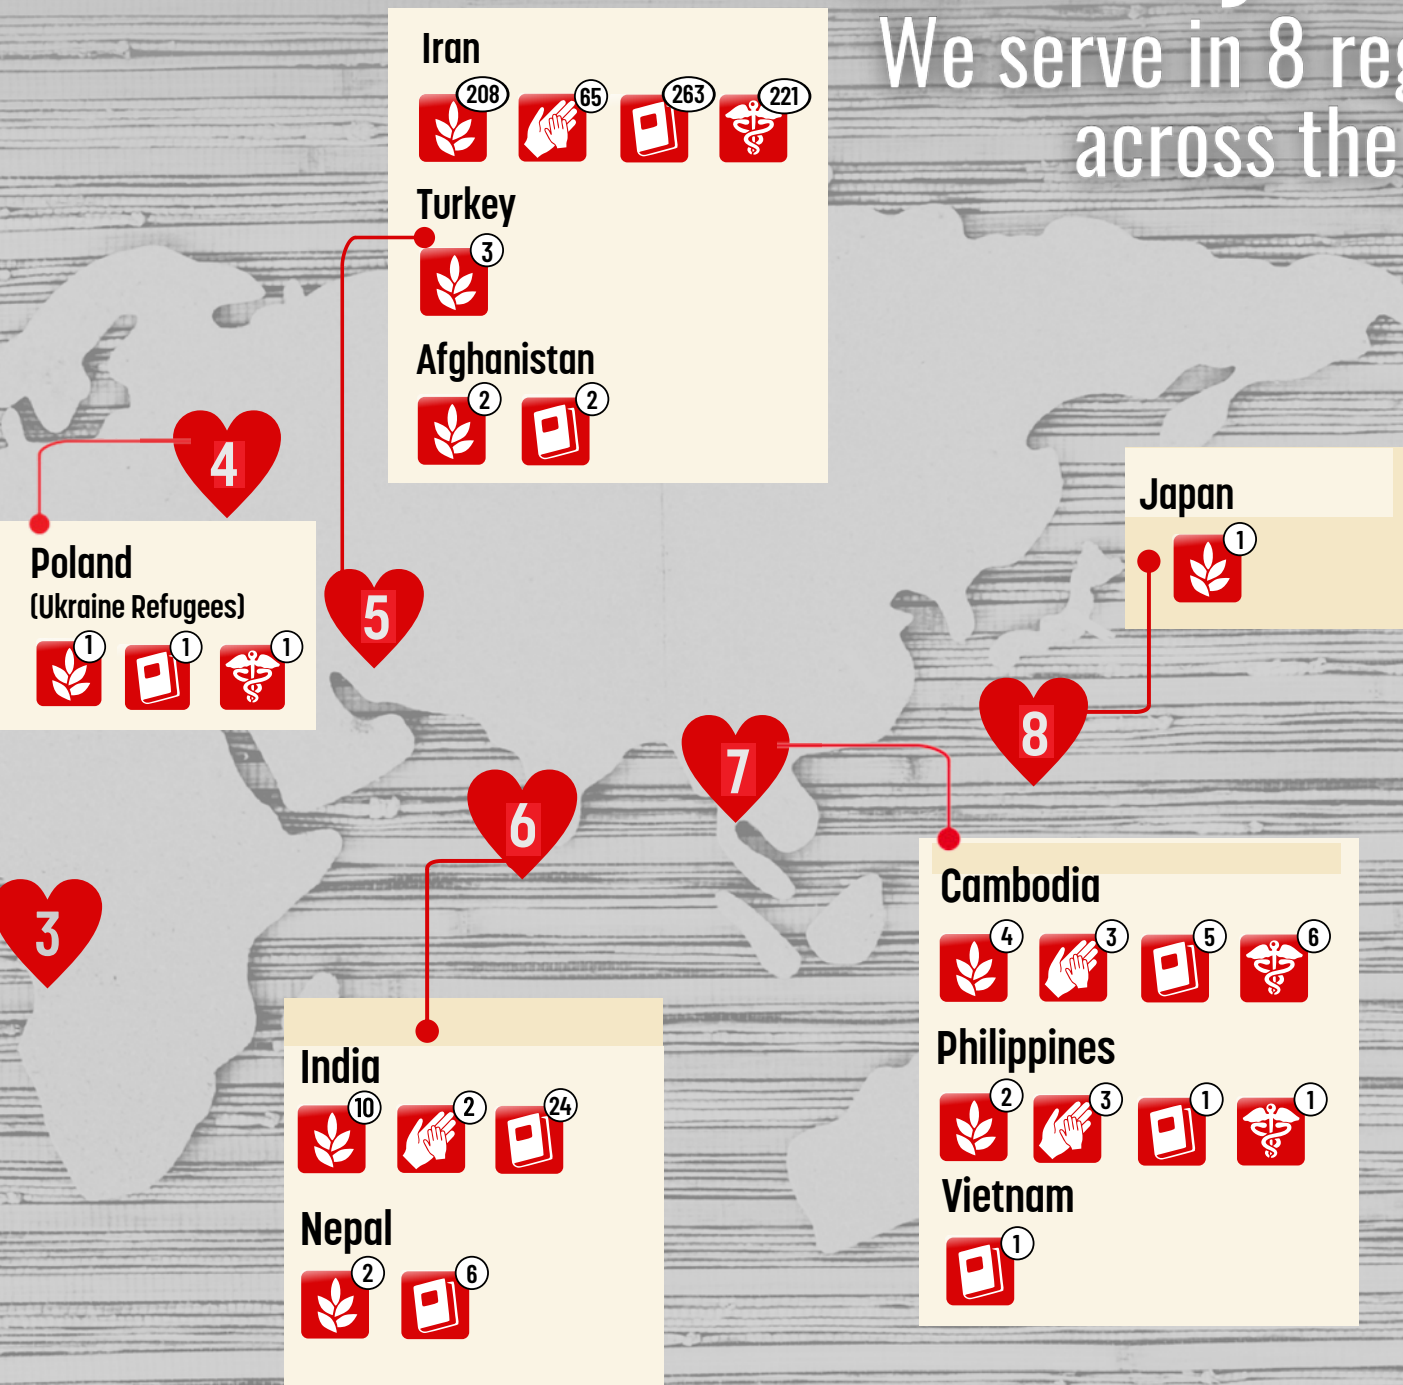

Kenya

Child by Child

We serve in 8 regions across the globe

IN IRAN

With a population of 89 million people, Iran is a country in Western Asia with a rich, diverse, and influential culture. It is considered to have been one of the cradles of civilization. Much of Iran consists of a central desert plateau, surrounded by mountain ranges. Due to its geography and topography, the Iranian people are subject to many natural disasters such as earthquakes, floods, and droughts.

Moms Against Poverty has been serving needy families all across the country since 2010. The focus of our programs has been the construction, establishment, and refurbishment of orphanages and schools, as well as providing ongoing orphan care and disaster relief by way of food and basic provisions distribution to those in need.

In 2022, COVID and its variants continued to present a significant problem for the population and a challenge for relief workers. Despite this, our team in Iran was able to keep up its valuable work, sometimes in extremely difficult conditions. They continued work on construction projects and the provision of critical food supplies and support to thousands of people in need. This was all made possible thanks to the generosity of many individuals, businesses, charities, and foundations.

2022 In Review

Orphan Care

- ♥ Continuously supported our **3** private orphanages in Gilan and Kerman for children aged 3-18
- ♥ Established **1** Vocational Training Center in Kerman offering **4** types of courses for orphaned girls aged 13 and up
- ♥ Supported **20** orphanages for children aged 0 and up (including orphans with disabilities) with food and basic needs

Health Care & Wellness

- ♥ **3** health care centers were constructed in Markazi, Sistan and Baluchestan, and Khuzestan provinces
- ♥ **184** healthcare centers were equipped in Sistan and Baluchestan province
- ♥ **2** hospitals were provided with vital operating rooms and bedside equipment in Tehran
- ♥ **41** wheelchairs were supplied to the needy and disabled in Sistan and Baluchestan province
- ♥ **10** refrigerators for vaccine and sample preservation were supplied to the Pasteur Institute of Iran
- ♥ Continued providing treatment allowances to children in several provinces in Iran

Education

- ♥ **16** schools were constructed or are in progress in 10 provinces
- ♥ **38** schools and vocational schools were equipped or repaired across several provinces
- ♥ **76** computers, **820** school supply packages, **213** backpacks, printers, and teaching aids books were supplied across Iran, including **78** nomadic schools
- ♥ **34** refrigerators and freezers were supplied to schools in South Khorasan province
- ♥ **3** Empowerment Workshops were equipped and held for young girls and women in Sistan & Baluchestan and Kerman provinces

Hunger Relief & Basic Provisions

- ♥ **8,600** food packages/food vouchers were distributed to those in need, including earthquake victims, the disabled, female heads of household, daycares, and expectant women
- ♥ **20** nurseries (including care for orphans with disabilities) were provided with food and basic needs
- ♥ **957,500** breakfasts were served to 3,924 nomadic children at schools in South Khorasan province
- ♥ **18** provinces across Iran benefitted from our bread distribution program
- ♥ **186** portable water tanks were provided for schools and areas in need. Water purifiers, desalination, and a piping system were also supplied in Sistan and Baluchestan province
- ♥ **1,317** pairs of shoes were provided for students, including those in nomadic schools, in South Khorasan, Qom, and Kohgiluyeh & Boyer-Ahmad provinces
- ♥ **8,000+** children received winter coats, shoes, and accessories in 16 provinces

Hearty Breakfasts, Happy Kids in Iran

In 2022, through Moms Against Poverty's Breakfast Program, 957,500 healthy and hearty breakfasts were distributed to 3,924 nomadic children during school. The story below is from Arjang, one of the nomadic children served by the program. For Arjang and his schoolmates, this nutritious breakfast is very often the only hearty meal they will get to eat during the day. For some of them, it's the very first time they have seen certain items, for example, milk and yogurt in cartons, and bananas.

ARJANG, AGE 10
MOHAMMADABAD VILLAGE, ZIRKUH, SOUTH KHORASAN

I was born into a nomadic family. My whole life, my best friends have been the goats that roam the fields. We depended on those goats for our food too. Our life continued in the same way for many years, until droughts became more frequent, and gradually, the number of our goats became less, life became harder and harder, and my mother had little food to put in front of us.

At school, I used to daydream about the days when yogurt and cheese were plenty. Sometimes the sound of my stomach rumbling with hunger was so loud that my classmates heard it, but I wasn't ashamed because all my classmates were suffering just like me. We know each other well, and we know each other's lives and hardships. Our class is held outdoors most of the time but, these days, before the beginning of the class, the teacher prepares a table for us and there is fresh breakfast on it every day.

I'm not constantly hungry anymore. We have milk in one break, an apple, or a banana in another. How good it feels to study without feeling hungry and without my stomach rumbling all day.

Sometimes I hear my mother crying. She tries not to let me know, but I hear her and know she is worried about my sister and me, and whether we're hungry. We don't have a refrigerator at home so usually when I eat, it is at school. Now, when I come home from school, I'm full of energy and I rush over to her. I tell her, "Please don't worry, Mom, tomorrow there will be more delicious food waiting for me at school." I hope I'm right. I just hate to hear my mother crying.

OUR APPROACH

PAVING THE PATH TO PROSPERITY

Poverty is a complex socio-economic issue which afflicts people all over the world. It spans generations and is rooted in income disparity, lack of opportunity, and limited access to essential services.

MAP has a holistically minded approach towards breaking the cycle of multi-generational poverty. First, we address the children's basic needs, such as food, shelter, and healthcare. Then, through educational and vocational programs, we provide them with the tools and environment they need to thrive and be able to serve their families and communities as adults. Thus, they break out of the vicious cycle of poverty.

*Opening Doors
Providing Opportunities
making Lasting Impacts*

IN THE UNITED STATES

Despite being one of the most economically stable countries in the world, 10.2% or 13.5 million households experienced food insecurity in the United States, according to data from the U.S. Department of Agriculture. Over 103.5 million cases of coronavirus have been documented in the U.S. according to the CDC. The continued pandemic continues to impact the most vulnerable of society, bringing increased issues of food insecurity, and limited access to education and health care.

Statistics show that supply chain disruption and galloping inflation rates led food prices to an all-time high in the U.S. in 2022. In addition, some of the safety net responses that buffered food insecurity in 2021 are no longer in place. Moms Against Poverty, therefore, continued to identify gaps in services provided by existing organizations and, in collaboration with our partners, tirelessly worked to fill them.

Since 2008, Moms Against Poverty has worked with over 40 schools and partners across the U.S. to provide food, basic needs, and educational resources to children living in marginalized communities. Over 100,000 children and their families in California, Pennsylvania, Virginia, and Washington D.C. received much-needed support from Moms Against Poverty in 2022.

2022 In Review

- ♥ **154,000** lbs of food were distributed to **11,500** families
- ♥ **1,200** boxes or backpacks of non-perishable food items were distributed to needy families
- ♥ **14,000+** items of basic provisions were distributed to **4,406** families
- ♥ **600** chickens were distributed to families in Contra Costa County in partnership with Food for Thought
- ♥ **2,000** toys, **235** blankets, **300** gift cards, and **100** hygiene kits were given out as part of our Holiday Helping Hand initiative
- ♥ **314** costumes were donated to our Halloween costume drive
- ♥ **375** gift cards were given out for Thanksgiving and Mother's Day
- ♥ **4** workshops with **30** attendees were held
- ♥ **120** families received health and hygiene supplies in Oakland, CA

- ♥ Distributed school supplies coupled with health education, including blood pressure checks, in partnership with Samuel Merritt University nursing students
- ♥ Partnered with East Palo Alto Academy Foundation to provide essential school supplies to students striving to continue on their educational journey
- ♥ Back-to-school donations were distributed through Castro Valley Helping Hands and Castro Valley Wellness Center. Marshall Elementary School Students, as well as the incoming 9th-grade class, were provided with backpacks, writing materials, and notebooks
- ♥ At the Missey Meet Me At The Market event in Oakland, CA, fruits and vegetables as well as **50** hygiene kits, **20** blankets, **20** pillowcases, **50** water bottles, and **20** pairs of socks were distributed to women and gender-expansive youth who have been sexually exploited

DANESH STEM EDUCATION PROGRAM FOR REFUGEE GIRLS

Danesh is a STEM Education program for refugee girls from the Middle East, grades 3-12, in Northern California. Launched in the summer of 2022, Danesh creates a space for learning science/tech that infuses role-modeling, fun, creativity, encouragement, and kindness. As a result, the girls will gain competency and confidence, opening a path for their future growth and opportunities.

The Danesh program provides insight into the field of study and jobs in STEM. Sparking the girls' interest in science, engineering, and technology will allow access to better-paying jobs, and greater economic opportunities for them, their families, and their communities. Girls who complete the workshops will receive a Certification of Achievement in STEM.

- ♥ **2** camps were set up in Sacramento, **1** in Roseville, and **1** in Davis
- ♥ Women from Afghanistan or the Middle East, who are working or interning in those sectors, were invited to speak and mentor the girls
- ♥ The camps impacted over **250** Afghan refugee girls aged 8-17
- ♥ Topics covered were robotics, programming, tech, art, electricity, circuits, electrical motors, sensors, goal setting, and role modeling
- ♥ Provided grocery gift cards for the girls to take home to their families

Feeding Hearts Souls and Minds in the United States

Perla (5) and Sulemi (6) are kindergarten and first-grade students at Fiesta Gardens International School. Perla is the youngest of 5 siblings and lives with her mom and dad in San Mateo, CA. She is from a low-income family that has also just had to take in her aunt and cousins to share their tiny apartment.

Perla's aunt was forced to flee her home in Los Angeles with her 5 children - the youngest of whom was just 3 days old at the time - because her oldest daughter was being abused by a male relative.

She fled a dangerous situation with nothing but the clothes she and her children were wearing. In her words, "This school has been a blessing for us. When my children attend FGIS we receive fresh food for my kids, toys, and support". She added, "We are so grateful. We are living with 4 adults and 10 children in a 2-bedroom apartment. Everything is so expensive these days.

We can't afford anything, and we still haven't found work, but the food we receive every Friday keeps us going and gives us hope for a better future".

Moms Against Poverty has donated more than 1,200 food boxes and toys to FGIS and many families have benefited, including Perla's family. According to Cynthia Jerez, Executive Director of Mission Preparatory School in San Francisco, another school in the area that received food boxes, "The issue of food insecurity is a grave concern in our community, with many of our students' families grappling with the harsh reality of hunger and its implications on their daily lives. This is where the tireless efforts of Moms Against Poverty have made a significant impact. The meal boxes they have donated not only address the immediate need for sustenance but also serve as a tangible reminder of the power of community support and collective action".

Margarita, a community worker at FGIS, brought us the story of Perla and her family. She adds, "We are witnesses of how Moms Against Poverty transforms lives every week because the healthy foods nourish not only the bodies of our students and families but also their spirits, which are filled with faith and hope".

*Create a Spark,
Inspire Change,
Transform Lives!*

IN CAMBODIA

Approximately 90 percent of Cambodia's impoverished population lives in rural areas, where the primary industry is agriculture. However, agriculture alone can't sustain everyone. Many families resort to child labor, human trafficking, and sex work to survive. Unfortunately, the lack of education and opportunity in these communities prompts many young adults to fall into the vicious cycle of alcohol and drug abuse.

Since 2008, Moms Against Poverty has worked in Cambodia to provide orphan care, basic provisions, and free education such as English, computer skills, media, and multimedia-related vocational programs to impoverished children and teenagers in Kandal Province. We continue to offer free daycare, preschool, after-school classes, and vocational training at our school, which serves over 110 children. Additionally, we provide basic provision resources to the community and fund foster care for impoverished children living in Prek BongKong, Prek Lvea, and Prek Ta Kov villages.

In Prek Ta Kov Commune, Moms Against Poverty Cambodia supports 111 kids and teenagers with monthly food provisions. These monthly food provisions of rice and food, worth \$20 monthly, help kids and teenagers to stay enrolled in school. Besides this monthly food support, Moms Against Poverty in Cambodia provides social services - mainly counseling - to the families and children in the community.

Currently, 111 students are enrolled in Moms Against Poverty's school. Primarily, it focuses on providing educational and vocational skills in multimedia, design, computer skills, coding, marketing, video & music production, and English. These extracurricular skills help them to become competitive and improve their chances of finding better-paid work outside the low-income job market.

Since Moms Against Poverty began working in Cambodia, 35 children and teenagers have been taken into alternative care. We found them caring for foster families within Prek Ta Kov Commune and took care of all their living and education expenses. Currently, 11 teenagers are still under our care in Cambodia.

2022 In Review

- ♥ **111** children received monthly food provisions at our school and foster programs throughout the year
- ♥ Youth Education Program combined media and English with practical, hands-on activities
- ♥ Collaborated with Golestan School in CA to empower and upgrade the Elementary Education Program
- ♥ Implemented a Computer Coding curriculum
- ♥ Funded the enrollment of **3** of our education program graduates into universities to study IT and law
- ♥ First-ever Soccer Championship for teenagers was launched in Prek Ta Kov Commune for **100** teenage boys and **50** teenage girls
- ♥ Representatives of the Ministry of Social Affairs, the Department of Social Affairs, and **10** NGOs visited our school in Cambodia. As a result, our education program was chosen to serve as a role model for other institutions and schools in Cambodia

One Man Changing Lives Forever in Cambodia

2022 in Cambodia was the year for Moms Against Poverty to reap the harvest of twelve years of educational and humanitarian work for orphans and other kids and teenagers from difficult, traumatizing, and impoverished backgrounds.

Moms Against Poverty established a program - Nader's Program - named after an inspirational young man. Nader left a privileged life in California and went to volunteer for a while, helping orphans, in Cambodia. So struck was he by the suffering of the impoverished children he saw there, he decided to stay. In 2009, he approached Moms Against Poverty asking for a grant to help run an orphanage. A relationship was formed, and later Moms Against Poverty decided to continue his legacy and create our own orphanage, where the curriculum he had inspired, and which has changed so many lives, is taught.

Nader's Program is a program for those with no program. Nader's Place is the place for the displaced.

Nader's Program is 12 years of intense work with distressed and traumatized kids and teenagers from impoverished backgrounds and taking Moms Against Poverty's philosophy "We believe in empowering impoverished children while respecting their individuality and maintaining their dignity and self-esteem" seriously. Not by imposing a curriculum upon the students but by truly focusing on the needs and interests of the students to, finally, design a curriculum based on these needs and interests.

This invaluable work experience enables Moms Against Poverty's team in Cambodia to state the following...

If we were ever again entrusted with the task of engaging young people in a poverty-stricken community, in a slum, or in a refugee camp, then we would go and observe. We would soon understand that the economic pressure is so intense that the majority of children can't attend school regularly. Instead, they are forced to find any kind of work. Hence, extracurricular education is needed.

We would also soon realize that the amount of trauma, distraction, seduction, peer pressure, and other factors hindering education are so much that one of the most important factors for reaching potential students is HOW TO TEACH! Thus, we would take time to observe exactly what the children that we hope to educate are interested in, and what they would truly like to do but cannot, simply because they are impoverished.

Then we would work on making it happen - making it possible for them to do what they would love to do. This guarantees a much higher level of excitement and commitment in terms of attendance and engagement.

Finally, creating educational content deriving from these activities.

Nader's Program invests in educating those that dropped out of school due to forced displacement. Nader's Program is first-aid education, paramedic education, and emergency education for those who desperately need it.

"We are so thankful for your consistent support at your school in Senegal. We had been working in difficult conditions but this is a huge help for our students and teachers."

- Madodia Diagne

"MAP Cambodia taught me how to stand up for myself and be a strong woman. Before the program, I never had the opportunity to receive a proper education, but MAP Cambodia gave me that chance and empowered me. Thank you for changing my life for the better and teaching me the necessary skills that have opened so many doors to my future."

IN SENEGAL

Located on the west coast of Africa, Senegal is bordered by Mauritania, Mali, Guinea, Guinea-Bissau, and the Gambia. Still one of the most stable and successful democracies in Africa, its population of 17.3 million nevertheless remains impoverished and undereducated. According to UNICEF, nearly half the population lives below the poverty line, and about 4 out of 10 children remain out of school. The country saw new challenges in 2022 with a slowing economy, rising food and energy prices, heavy flooding, and the lingering effects of COVID.

Poverty and food insecurity are rife in rural areas where the population relies on farming and fishing, which are frequently affected by drought and other dramatic conditions brought on by climate change. For the rest of the population, tourism has become a significant source of income. The impact of COVID has rendered this sector of the population devastated, hungry, and even more impoverished.

2022 In Review

- ♥ Constructed a new building at the Diamaguene III Elementary School, enabling **180** more children to attend school
- ♥ Constructed new toilets, benefitting over **1,000** elementary school children
- ♥ Rebuilt storm-damaged walls at **1** elementary school
- ♥ Provided over **750** children with free health insurance cards, and provided over **2,000** children with free medication at a community health clinic
- ♥ Provided **900** students at **4** preschools with nutritional meals for the entire school year
- ♥ Provided **25** children at a rural orphanage with year-round food, water, milk, medicine, and hygiene supplies

A close-up photograph of a young girl with dark skin and short, dark hair. She is looking slightly to the right with a gentle expression. A red heart graphic is overlaid on the left side of the image, partially covering her face. The background is blurred, showing another person in a blue headscarf.

A Story of Seeing is Believing in Senegal

Seynabou's family had only known a simple life in their rural village, eking out an existence by living off the land. Due to adverse climatic conditions which robbed them of their ability to thrive, they were forced to pack their meager belongings and migrate, in a desperate bid for survival, from their village to the big city of Mbour.

Life in the city was brutally hard for the family. Although Seynabou's father took an apprenticeship as a sheet metal worker, there was still barely enough to provide for them, and the only roof over their head became a squat in an abandoned house in the city. A family friend eventually took them in, but there was still not enough to put food on the table every night. Her parents were struggling to keep the family alive, so when Seynabou started to develop an eye condition, with no means to pay for medical attention, this crisis threatened to plunge them even further into desperate straits.

At first, she noticed that she was having trouble seeing. When she attended her Moms Against Poverty school, she realized she needed to sit in the front row to see the blackboard. But then her parents and teachers noticed that her eye was becoming cloudy. Eventually, her blurred vision turned to pain, and she was struggling to see anything at all.

Her teachers were aware of the Moms Against Poverty Health Emergency Fund and advised Seynabou's family to submit a request for assistance in diagnosing and treating her mysterious eye condition. Within just a few days, Seynabou had an appointment with an eye specialist in the capital city of Dakar, with her visit and transportation sponsored by Moms Against Poverty. The doctor was able to diagnose and treat the infection she was experiencing, relieving her eye pain and restoring most of her vision. With Moms Against Poverty's assistance, she was prescribed a precious pair of glasses that helped restore her vision to normal and ensured she could continue her progress in the classroom.

Today, not only does Seynabou have a brand-new pair of glasses and improved vision, but she's at the top of her class in 3rd grade and so, not only can she clearly see the blackboard, but she can just as clearly see the future ahead for her. It looks very bright!

At all of our schools in Senegal, Moms Against Poverty's Health Emergency Fund helps young children like Seynabou receive necessary medical attention when the family cannot afford it. Students at our schools, like Seynabou, receive the medical care they need so they can continue their studies and become the bright young minds that will change Senegal - and the world.

**Names and details have been changed to protect the anonymity of the child*

Programs

Hunger Relief & Basic Provisions

Orphan Care

Education

Health Care & Wellness

IN SIERRA LEONE

Sierra Leone continues to be one of the poorest countries in the world. Its population of more than 8.6 million still struggles to overcome the effects of a decade-long civil war, despite the war having ended 20 years ago. Sierra Leone has an abundance of natural resources and international support has been strong, but the country remains challenged by a lack of infrastructure, access to water, sanitation, health care, and education. According to the World Bank, the literacy rate in Sierra Leone is 43%, with many villages having 10% literacy or less.

Moms Against Poverty began working in Sierra Leone in 2012. Since then, we have constructed three schools, established a learning center, and equipped village schools with solar lights and wells. These programs not only provide clean drinking water for the entire village but also a safe space, which doubles as a community center for hundreds of children and their families.

In 2022, we continued our successful partnership with Families Without Borders. The following was carried out in 30 rural villages:

- ♥ Solar lights were installed in primary schools to enable a longer school day and improved conditions during the rainy season
- ♥ Sanitation and basic hygiene education were provided
- ♥ School supplies were distributed

IN PHILIPPINES

Situated off the coast of Vietnam, the Philippines is an archipelago of more than 7,000 islands. Tremendous wealth exists alongside tremendous poverty in Filipino society. The country remains largely agricultural, although it has the potential to become a strong industrial economy, rich as it is in natural resources.

With a population of 115.5 million in 2022, poverty and malnutrition are rife. According to UNICEF, the remnants of COVID, climatic change, economic shocks, and rising prices are hitting vulnerable families particularly hard. Malnutrition is being driven by systems that are failing to provide children with adequate diets, space to play and exercise, access to safe water, sanitation, and financial security.

Since January 2021, Moms Against Poverty has worked with Angel House, a local orphanage, to provide short-term care for neglected, abandoned, abused, and orphaned children. In the latter part of 2022, students returned to face-to-face classes after more than 2 years of remote learning. Seven new admissions were made. The scholarship program recommenced and students were provided with uniforms, school bags, and supplies. Their school fees were paid when required. Our feeding program continued to provide food for poor families. Moms Against Poverty assisted the orphanage with funding for groceries, infant formula, medicines, and transportation costs.

- ♥ Partnered with Angel House Orphanage to provide funds for food, baby formula, utility, medical and educational expenses
- ♥ 10 needy families were supplied with rice for 12 months

IN INDIA

Despite the fact that India's economy continues to grow, over 800 million of its population were still living in poverty in 2022. 30% of very poor children in the world live in India, according to the United Nations. Children from rural areas, slums, and poor urban families suffer from malnutrition, and lack of access to water, sanitation, hygiene, health care, and education.

Both girls and boys in India face early marriage, domestic abuse, sexual violence, violence at home and in school, trafficking, online violence, child labor, and bullying. All forms of violence, abuse, and exploitation have lifelong consequences on children's lives.

Beginning in 2021, Moms Against Poverty partnered with Mother Miracle School in a slum area of Rishikesh, India, to fundraise for them and lend financial support. To ensure a safe and effective classroom environment, we provided funds to construct an additional story and classrooms to accommodate new and advancing students. Completed in the spring of 2022, these classrooms will improve the educational experience for children and the economic prospects of their families.

- ♥ An additional story with 7 classrooms was added to Mother Miracle School in Rishikesh
- ♥ 10,500 students will benefit over the next 50 years

IN NEPAL

A background photograph showing several children in Nepal. In the foreground, a young girl with dark hair and a nose ring looks directly at the camera with a serious expression. She is wearing a red and yellow patterned dress. Behind her, another girl in a black shirt and a white headscarf is visible. To the right, another child is partially seen. In the lower left, a boy in a grey shirt and a patterned headband looks towards the camera. The background is slightly blurred, showing more children and a natural outdoor setting.

Still considered one of the poorest countries in the world, Nepal has a population of over 30 million people. Three percent of Nepal's children die before the age of five. According to World Bank statistics, 29% of Nepal's inhabitants are classified as poor, and in the 2022 Global Hunger Index, Nepal ranks 81st out of 121 countries.

Nepalese children living in extreme poverty may be forced into child labor, into working in the drug trade, being sold as indentured servants, or being trafficked into the sex trade. Education provides a deterrent to trafficking and a pathway out of poverty, but orphaned and vulnerable children require more academic assistance than other students. Beginning in November of 2022, Moms Against Poverty continued a successful partnership with Sunsar Maya.

♥ 240 children at each of Sunsar Maya's three locations in Nepal were provided with nutritious food supplies.
